Dodge Standard Six Replaces 4-Cylinder Car

After over two years of intensive development work, Dodge Brothers, Inc., announces the Standard Six line of passenger cars, priced from \$875 to \$970 and superior in speed and acceleration to any cars selling at \$1000 or less. In these new cars, it is claimed, exceptional riding comfort, economical performance and ability to travel at sustained high speeds have been combined with the sturdiness and dependability for which Dodge Brothers motor cars have always been so well known.

The new cars are displayed in the showroom of Allen H. Paull, local Dodge Brothers dealer at 1623 Cabrillo avenue. The factory is now building the Standard Six in four body types, the coupe, sedan, deluxe sedan and cabriolet, finished in a number of different attractive color combinations. Production of the new sixes is now 1,000 per day and Dodge Brothers schedules call for total output of all types exceeding 1650 per day, the largest production schedule in Dodge Brothers history. With the introduction of the Standard Six, Dodge Brothers, Inc. announces the discontinuance of the four cylinder passenger cars which were priced at approximately the same level at which the Standard Six is now offered. The three distinct lines of Sixes now being made by Dodge Brothers include the Standard Six, the Victory Six and the Senior, at a price range from \$875 to \$1,170 and embracing all the popular body types and an unusually extensive selection of color combinations.

BUILD AND LIVE IN TORRANCE

An Economical Home for a Narrow Lot

R. C. HUNTER & BRO. Architects

By R. C. HUNTER & BRO., Architects, New York.

The plan layout of this house merits study. It is most compact and requires but a forty-foot lot yet it is complete in every detail including a garage, maid's room, dining alcove, large wardrobe and storage space. The compact arrangement of the stairs, the grade entrance which serves kitchen and cellar, the elimination of halls and the utilization of space over the living porch and over the garage all make for economy.

The exterior has also been very thoroughly studied. Note how the vestibule is handled and the wall on the opposite end of the living porch to give the effect of increasing depth of solid wall and avoid placing the dormer on "stilts" as would be the effect should only columns be used for the porch. A stucco finish with well placed timber work gives a pleasing effect. Complete working plans and specifications of this may be obtained for a nominal sum from the Building Editor. Refer to House A-162.
